- A query-based logo search and detection system by employing a simple, fully differentiable one-shot learning framework which is adoptable to new classes.

## CONFERENCE PAPERS

1. **Shuvozit Ghose**, Pinaki Nath Chowdhury, Partha Pratim Roy, Umapada Pal, “Modeling Extent-of-Texture Information for Ground Terrain Recognition”, *International Conference on Pattern Recognition (ICPR)*, Milan, 2020.[[PDF](#)] [[Github](#)] [[arXiv](#)]

### • Highlights:

- A novel approach towards ground-terrain recognition by modeling the extent of texture information to establish a balance between the order-less texture and ordered-spatial information locally.
- Introduced Intra-domain Message passing mechanism and Inter-domain Message passing module in the context of ground terrain recognition for rich feature learning.

2. Perla Sai Raj Kishore, Ayan Kumar Bhunia, **Shuvozit Ghose**, Partha Pratim Roy, “User Constrained Thumbnail Generation Using Adaptive Convolutions”, *International Conference on Acoustics, Speech, and Signal Processing (ICASSP)*, London, 2019.[[PDF](#)] [[Github](#)] [[arXiv](#)] [[Oral](#)]

### • Highlights:

- A new framework for user constrained thumbnail generation using Adaptive Convolutions.
- Our method has achieved superior performance in comparison to other conventional approaches.

## SUBMITTED PAPERS

1. Amandeep Kumar\*, **Shuvozit Ghose\***, Pinaki Nath Chowdhury, Partha Pratim Roy, Umapada Pal, “UDBNET: Unsupervised Document Binarization Network via Adversarial Game”, *International Conference on Pattern Recognition (ICPR)*, Milan, 2020.[[PDF](#)] [[Github](#)] [[arXiv](#)] [**\*Equal Contribution**][Second Round Submission]

### • Highlights:

- Introduce adversarial game first time in the domain of document image binarization by proposing Adversarial Texture Augmentation Network (ATANet) and Unsupervised Document Binarization Network (UDBNet).
- Introduce a joint discriminator which tries to couple the ATANet and UDBNet so that it can tackle the dataset bias problem and perform well on the real degraded document image.

## FAMILIARITY WITH DL
